

luminance-enhancement film laminated.

Please add new claims 8-10 as follows:

8. A laminated optical device according to claim 1, wherein said birefringent layer contains a discotic or nematic liquid crystal oriented planarly horizontally or thicknesswise obliquely.
 9. A laminated optical device according to claim 1, wherein said birefringent layer contains a cholesteric liquid crystal oriented in a Grandjean texture.
 10. A laminated optical device according to claim 1, wherein said birefringent layer contains a liquid crystal nematically oriented at an angle of twist of from 0 to 360 degrees.
